

Zilon HydroCoat+ Graphene Appearance Spray Product Information

Summary

Graphene is a truly revolutionary technology that is comprised of a honeycomb structured carbon molecule which is a mere one atom thick and is both extremely hard and incredibly flexible.

Just as importantly, graphene has a very high contact angle, giving it excellent hydrophobic properties that combined with its strength and flexibility, make it the perfect material to be used in our latest line of Zilon automotive and marine products.

Benefits

- Advanced Graphene technology
- Easy to use, spray on and wipe off
- Excellent hydrophobic properties
- Less prone to water spotting
- Higher scratch resistance
- Increased depth and clarity to paint finish

Application instructions

1. Shake well before use
2. Prior to application, completely wash and dry the vehicle
3. Generously spray product directly on the surface of the vehicle and wipe dry with a clean microfiber towel

Caution

Keep away from children. Store in a cool dry place. Avoid breathing fumes. Wear protective clothing and glasses and avoid contact with skin and eyes. If in eyes, remove contact lenses and rinse thoroughly. If contact with skin is made that causes irritation, wash the effected area thoroughly with soap and water. If any adverse effects persists, seek medical attention as soon as possible. If product is inadvertently swallowed, seek medical attention immediately.
